

Experience

Netskope, Staff UX/UI Designer

Sep 2021 – Current, Santa Clara, CA, US

- Led end-to-end design for three 0-to-1 AI products — AI Guardrails, AI Red Teaming, and AI Inference — partnering across inference and infrastructure teams with direct alignment to executives
- Owned design for core threat protection workflows — UEBA, IPS, Threat Protection Policies — translating complex security signals into actionable UI
- Drove platform-wide reporting & analytics experience, giving security teams visibility across usage, risk, and policy data
- Spearheaded design system tokenization migration, establishing scalable foundations across product lines

ChainScale, Inc. Product Designer

9/2018 – 9/2021, Mountain View, CA, US

- Led design for Celer Network products, partnering with PMs and engineers to ship 0-to-1
- Conducted user research and testing to identify pain points and inform design direction
- Established branding, design system, and creative guidelines

SAP, UX/UI Design Intern

1/2018 – 09/2018, Palo Alto, CA, US

- Designed UX/UI features in partnership with PM and engineering
- Conducted user research and interviews to inform design decisions
